

Interpreting the EasyCBM Progress Monitoring Test Results

Note: These grade-level progress monitoring scores provide initial guidance on interpreting student performance on the reading measures available through the www.easycbm.com website. Benchmark measures are only available on the District version of easyCBM.

Note: Values for the reading measures are currently based on approximately 2000 students per grade level, from Oregon and Washington. Values for the math measures are based on a stratified national sample with approximately 1500 students per grade level.
